

MONITORING LOG FOR REFRIGERATED CONDENSER

Please note the following:

- TEMP 1 is the temperature difference between air-PCE mixture entering and exiting the refrigerated condenser. (OUTLET TEMP - INLET TEMP = TEMP1)
- TEMP2 is the temperature of air-PCE mixture at the outlet of the refrigerated condenser.
- TEST DATE is the WEEKLY temperature measurement date.

		For Washer			For Dry to Dry Dryer, or Reclaimer
	Test Date	Outlet Temp	Inlet Temp	Temp 1	Temp 2
